## Impact Data for School Pupil Support July 2023

### Context

Following support from the Exciting Education team, we asked a member of staff from each school to complete an online survey to assess the impact of the intervention on each of the children we supported.

This survey was carried out between May 2022 and July 2023. We received responses for a total of **237 pupils** who had recently received support on a 1:1 basis from one of our coaches.

The staff member who completed the survey was asked to answer only the questions that were relevant to the individual pupil and ignore questions that were not.

The numerous schools who responded to this survey included primary, secondary and specialist provision schools from across Devon, Cornwall and Plymouth. The schools were located in a wide range of different socio-economic areas.

The pupils were all aged between 9 and 18 years old and most pupils took part in 5-6 sessions, lasting up to an hour each.

The majority of pupils in this survey were children who had experienced significant childhood trauma.

## **Headline Data – July 2023**

**Based on school feedback for 237 pupils**

### **Overall impact on the children following our support**
